PROFESSIONAL SUMMARY

Full Stack Software Engineer with 4+ years of experience designing and developing scalable web applications, enterprise APIs, and cloud-enabled software solutions using Java, Spring Boot, React.js, TypeScript, and PostgreSQL. Experienced across frontend, backend, and deployment workflows within Agile software development environments. Skilled in RESTful APIs, database optimisation, Docker, AWS, automated testing, and secure software development practices. Currently graduated on MSc in Computer Science with research focused on federated learning and anomaly detection systems.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, TypeScript, Python, C#, SQL, Bash

Frontend: React.js, HTML5, CSS3, Material UI, Thymeleaf

Backend: Spring Boot, Node.js, ASP.NET Core, Apache Camel, Django, ColdFusion

Databases: PostgreSQL, MySQL, SQL Server

Testing: JUnit, Mockito, Jest, Cypress, End-to-End Testing

Cloud & DevOps: AWS, Docker, Git, Linux, CI/CD

Tools & Methodologies: Agile, JIRA, Confluence, REST APIs, Microservices, Authentication & Authorisation

PROFESSIONAL EXPERIENCE

Software Engineer – Paymentology Limited, United Kingdom

Feb 2020 – Jan 2024

- Developed and maintained scalable RESTful APIs using Java, Spring Boot, Apache Camel, and PostgreSQL.
- Built responsive frontend applications using React.js, TypeScript, HTML5, and CSS3.
- Designed and optimised relational database schemas to improve application performance and query efficiency.
- Implemented authentication and authorisation mechanisms for secure client-side and server-side access control.
- Developed automated unit and end-to-end tests using JUnit, Mockito, Jest, and Cypress.
- Collaborated within Agile software development teams using JIRA, Confluence, and Git version control workflows.
- Participated in deployment and maintenance of production applications using Docker and AWS services.
- Improved frontend rendering performance and reduced unnecessary network requests for enhanced user experience.
- Worked on enterprise payment-related systems while following secure software development and compliance practices.

Software Engineer Trainee – IT Deurali Inc. Pvt. Ltd., Nepal

Jul 2019 – Jan 2020

- Completed enterprise software engineering training focused on Java and Spring Boot.
- Developed backend applications and database-driven web solutions using Java, MySQL, and PostgreSQL.
- Built dynamic web interfaces using Thymeleaf templates.

- Applied object-oriented programming concepts and real-world software problem-solving techniques.

PROJECTS

Federated MQTT Anomaly Detection System

- Developed a federated learning system using Flower and XGBoost for MQTT traffic anomaly detection.
- Simulated distributed learning environments using Ubuntu virtual machines and ARM-based architecture.
- Worked with MQTTset datasets for behavioural analysis and anomaly detection research.

EDUCATION

Master of Science (MSc) in Computer Science – University of Staffordshire
2025

Dissertation: Detecting Federated XGBoost Anomalies for Medical Internet of Things (MIoT). Research focused on anomaly detection in smart wound healing systems using federated learning.

Bachelor of Science in Computer Science and Information Technology – Tribhuvan University
2019

CERTIFICATIONS

- OWASP Top 10 Security Awareness
- PCI DSS Security Awareness
- Kevin Mitnick Security Awareness Training (2022 & 2023)
- Cyber Security for Remote Workers

LANGUAGES

English – Professional Working Proficiency (B2)

Nepali – Native/Fluent
